

# Application of Building Information Modelling for Sustainable Construction and Energy Efficient Buildings

## Trainee's Webinar GET INVOLVED

## Want to be part of the new era in construction? Join BIMcert!

Whether experienced or just beginning on your journey of Digital Construction, come along and join our BIMcert Webinars! Have your say at the final round of trials and testing on the latest training and self-assessment materials for this innovative European-funded project.

**Event Date:** Tuesday, 19<sup>th</sup> November  
**Times:** 12:30-13:30 (GMT)  
**Click & Connect via:** [GoToMeeting Link](#)

### What next?

To reserve your place(s) and confirm your attendance, please click on the [Eventbrite link](#)

BIMcert, a European Union H2020 Research and Innovation Project, aims to develop and implement a blended, fully supported suite of tools and Building Information Modelling training curriculum, allowing geographically dispersed construction project teams to use technology to enhance information exchange and collaboration.

To find out more visit the BIMcert website at <https://energybimcert.eu/>

### Who should attend?

The webinar is open to all within the construction industry to attend irrespective of their role and knowledge level of digital construction.

### Webinar Outcome

The webinar will demonstrate and showcase the latest BIMcert platform and training curriculum developed for digital construction and BIM.

### Two-way Benefit?

Findings from the webinar will help developers finalise the BIMcert training programme and e-learning platform. BIMcert will provide you the opportunity of being part of an innovative educational project, along with giving you better insight into how it will be advantageous for you and your business at all levels.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 785155
